

How to import the project?

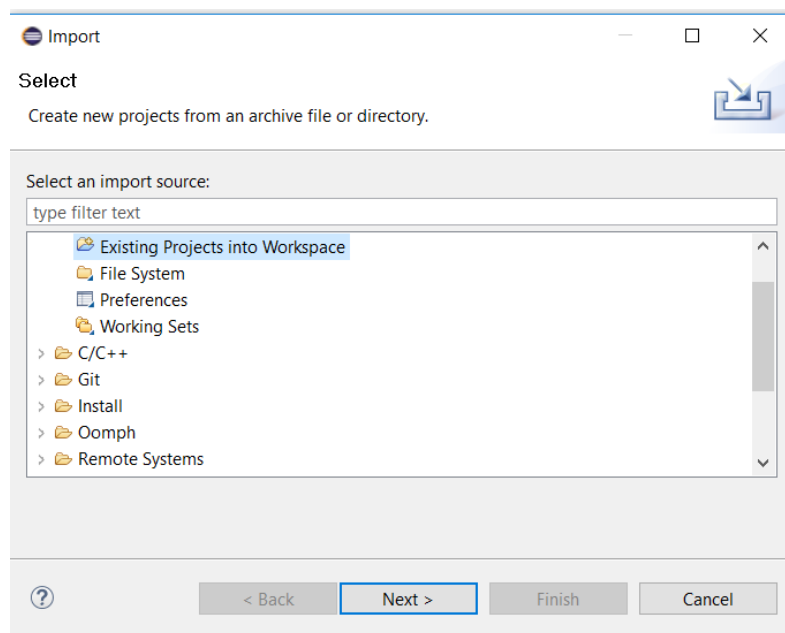

- 1- Unzip the “FOS_PROJECT_2021_template” by right click on it and select “Extract here”.
- 2- Copy the extracted folder into the “fos_cygwin/FOS_CODES” folder

	bin	4/24/2021 11:47 PM	File folder	
	dev	2/8/2018 5:28 PM	File folder	
	eclipse	5/20/2021 3:09 PM	File folder	
	etc	2/8/2018 5:29 PM	File folder	
<input checked="" type="checkbox"/> 	FOS_CODES	5/20/2021 2:47 AM	File folder	
	home	2/15/2017 12:43 AM	File folder	
	lib	2/8/2018 5:30 PM	File folder	
	opt	2/8/2018 5:26 PM	File folder	
	sbin	2/8/2018 5:26 PM	File folder	
	tmp	3/17/2016 4:43 PM	File folder	
	usr	2/8/2018 5:28 PM	File folder	
	var	2/8/2018 5:28 PM	File folder	
	Cygwin.bat	3/13/2016 11:53 PM	Windows Batch File	1 KB
	Cygwin.ico	3/12/2016 1:57 PM	Icon	154 KB
	Cygwin-Terminal.ico	3/12/2016 1:57 PM	Icon	53 KB
	FOS_Developer_Console.bat	2/8/2018 4:52 PM	Windows Batch File	1 KB
	FOS_Eclipse.bat	2/8/2018 4:48 PM	Windows Batch File	1 KB
	FOS_Labs_Template.zip	4/1/2017 12:03 AM	WinRAR ZIP archive	189 KB
	FOS_Readme.txt	3/20/2016 1:00 PM	Text Document	1 KB
	Restore_Original.bat	2/8/2018 4:47 PM	Windows Batch File	1 KB
	setup-x86.exe	3/12/2016 1:35 PM	Application	834 KB
	unzip.exe	2/21/2017 3:29 PM	Application	164 KB

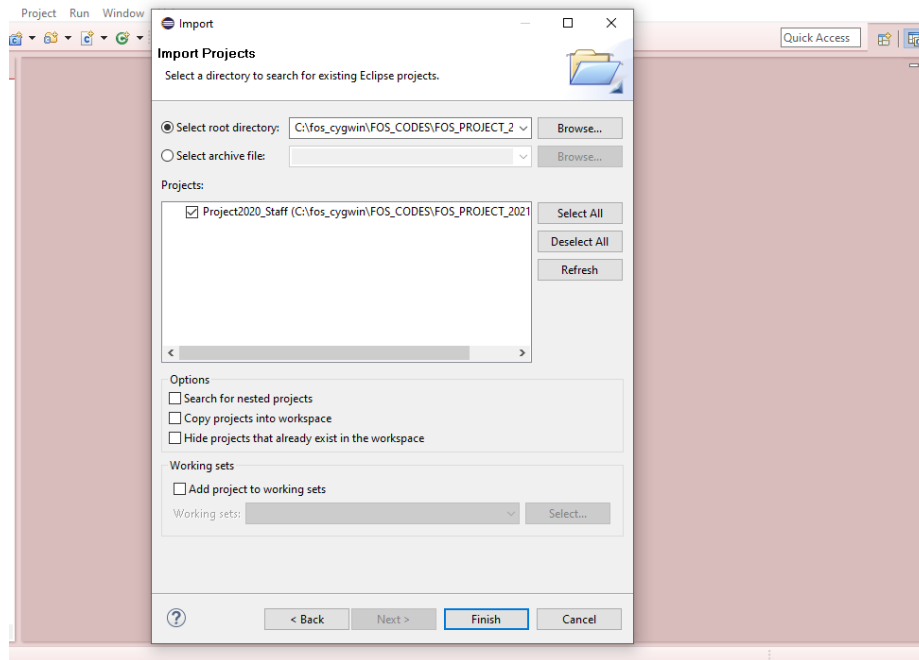

- 3- In eclipse:
 - Right click in the project explorer
 - Choose ‘Import Project’

- Choose 'Existing Projects into Workspace'

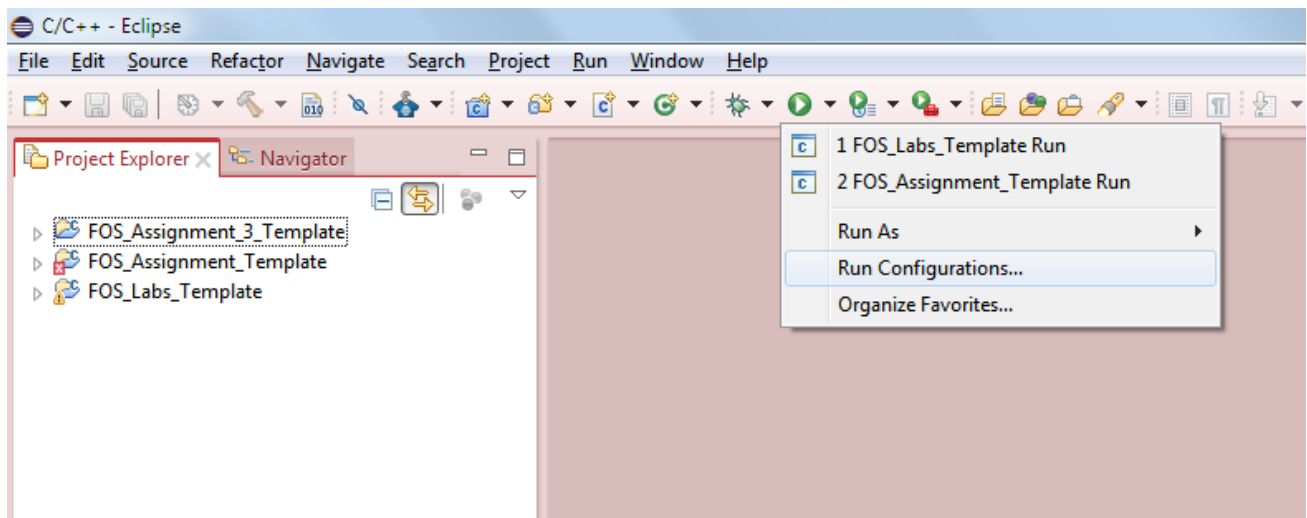

- Browse for the path of the extracted folder

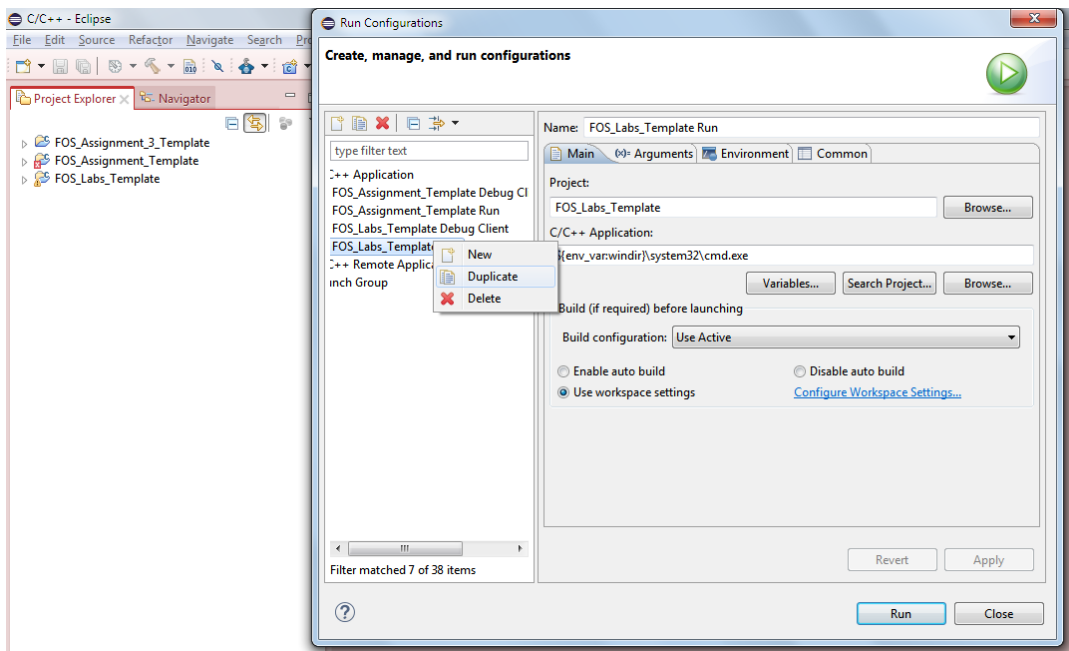

- Click 'Finish'

Now the project is added, we need to adjust the running configurations

- From the run, choose 'Run Configurations'

- Right click on 'FOS_Labs_Template Run' → Duplicate

- Rename it to be 'FOS_Project Run' and choose the project path
- Click 'Apply' → 'Run'
